

MUHAMMAD ALI

BS Artificial Intelligence Student | Aspiring Software Developer

Lahore, Pakistan | 0330-9231907 | alimuhammad2net@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Motivated BS Artificial Intelligence student at UET Lahore with hands-on experience in C and C++ through object-oriented academic projects. Seeking an internship opportunity to apply strong programming fundamentals, problem-solving skills, and a growing interest in software and web development to real-world projects while continuing to build technical expertise.

EDUCATION

BS Artificial Intelligence (BSAI) <i>University of Engineering and Technology (UET), Lahore</i> CGPA: 3.2 / 4.0	Present (Ongoing)
Intermediate in Computer Science (ICS)	Completed
Matriculation	Completed

PROJECTS

Online Auction System

C++ | Object-Oriented Programming | Team Project

- Designed and implemented a console-based auction management system applying core OOP principles including encapsulation, inheritance, and polymorphism.
- Built a class hierarchy for User, Buyer, Seller, and Admin roles to handle bidding, listings, and account management.
- Collaborated with a team of three using Git for version control, resolving merge conflicts and coordinating feature development.
- GitHub: github.com/USMANNATT/OnlineAuctionSystem

Hospital Management System

C | Procedural Programming

- Developed a hospital management system in C to handle patient records, appointments, and data storage using structures and file handling.
- Implemented modular functions to keep the codebase organized, readable, and maintainable.

TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript, PHP(basic)

Web Technologies: HTML, CSS

Tools: Git (basics), Visual Studio Code

Concepts: Object-Oriented Programming, Procedural Programming, Data Structures Fundamentals

STRENGTHS

- Strong grasp of OOP concepts: classes, inheritance, polymorphism, and operator overloading.
- Quick learner, currently expanding skills into full-stack web development.
- Comfortable working in team environments using Git-based collaboration.
- Detail-oriented with a disciplined approach to debugging and testing code.
